EARTH DAY & GPF'S FOOT PRINT

In these days of high pollution and higher gas prices, it only makes sense that Guardian Protection Force has a small, yet impressive, fleet of hybrid-patrol vehicles. Currently, we have two Ford Maverick trucks, two Ford Escapes, and one Ford Bronco.

These vehicles have been essential in both our daily operations and especially with our patrols. As technology advances a steady trend is emerging and it appears to be gaining steam; *Hybrid and electric vehicles are here to stay*.

Also, it cannot be overstated that the accidentavoidance safety features in these newer models are invaluable;

Blind spot detection mirrors, collision avoidance alarms, and rear cameras All of these features have helped our armed-patrol drivers maintain a level of safety when on the road.

NATIONAL CANNABIS AWARENESS

Oh how times have changed, am I^sright?

While the politics and taboos of marijuana remain up in the air there is one thing that is factual: Cannabis dispensaries and cultivation centers are high targets for theft and armed robbery.

Things are made even more complicated as federal law still recognizes marijuana and its products as schedule one, or strictly illegal substances. As such, no bank or credit union will have any direct affiliation with the cannabis industry.

This means the industry is forced to use CASH and lots of it. Read more <u>here.</u>

FEATURE FRIDAY: FTO ESNARD

It is obvious, to those who know him, that FTO Esnard has been shaped by his time in the service. Even when it seems like he has been beaten down with fatigue he never gives up. Joining the armed forces fresh out of Highschool in 2011, Esnard embraced the military lifestyle and considers it the best decision he has every made. Now operating a mortar crew as a Section Sergeant he plans to stay the course until retirement. Thank you very much, FTO Esnard, for your outstanding dedication to duty and service to our country. Congratulations!

STRESS MANAGEMENT FOR SECURITY PROFESSIONALS

If we could sum up the last two years into one word, l think most of us can agree, that word would be "stressful." While the pandemic has been the root cause of a lot of stress, for some, COVID-19 just amplified what was already there. Everyone can agree that we live in very stressful times, and this can negatively affect our health and the health of those around us. Understanding stress management and how it affects us are the tools needed

to navigate the constant

squalls of turmoil and bitterness that we face. <complex-block><complex-block>

ADMINISTRATIVE PROFESSIONALS DAY

It can be argued that security officers are the tip of the spear, braving the front lines when dealing with situations. If that is the case, then the administration staff are the shaft that pushes the tip forward. They are the unseen, and often unacknowledged workers that keep Guardian Protection Force running seamlessly. Having a competent workforce that can tame the vast quagmire of logistics is invaluable, and GPF is proud to have four extremely capable women supporting our team:

Adelynn Camacho (Executive Assistant) Katarina Bilandzich (Administrative Assistant) Sommer Gonzales (Administrative Assistant) Jenny Saechao (Human Resources Representative.)

Guardian Protection Force would like to thank its administration staff very much for their dedication and professionalism. Together they have dominated challenge after challenge and keep the spear moving forward. We hope to continue watching them grow and thrive within this company.
